

REMARKS

Applicant respectfully requests that the foregoing amendment be made in order to replace the previously filed Sequence Listing with the substitute Sequence Listing filed herewith into the specification. No new matter has been added.

The substitute Sequence Listing contains a correction to SEQ ID NO: 12. SEQ ID NO: 12 was published in the International Application with the tryptophan residue at position number 26 omitted. The correct sequence has now been provided. Basis for this correction can be found in Figure. 23.

Applicant believes that the present application is now in condition for allowance. Favorable consideration of the application as amended is respectfully requested.

The Examiner is invited to contact the undersigned by telephone if it is felt that a telephone interview would advance the prosecution of the present application.

Respectfully submitted,
